Education

University of Missouri ~ Columbia – Dec 2024

Bachelor of Science in Electrical Engineering

- Minors: Computer Science & Mathematics

- GPA: 3.394

Governor's State University – Dec 2026

Pursuing a Master of Science in Cybersecurity

Skills

- Microsoft Office Suites, C/C++, Linux/Unix, HTML/CSS, Python, LabView, MATLAB, Swift, Arduino, Raspberry Pi, AutoCAD, PCB Design, KiCad, RFID, Multimeters, Oscilloscope, Power Generator, Power Electronics, Analog Circuits, Digital Circuits, Wireshark, TCP/IP

Work Experience

U.S. Security Clearance (Secret)

The Boeing Company (BDS), Oklahoma City, OK - Internship

(May 2023/24 – August 2023/24)

- Actively Designed circuit layouts for AWACS & AEW&C aircraft wiring diagrams and assisted in LRU Qualification, ensuring compliance with mission-critical aircraft testing.

Commonwealth Edison (Exelon), Chicago, IL – Internship

(May 2022 – August 2022)

- Modeled a 26-mile underground/overhead fiber route optimizing power distribution efficiency by 40%.

Wight & Company, Darien, IL – Internship

(May 2019 – August 2019)

- Coordinated contractor bidding and scheduling while ensuring compliance with safety regulations

University of Missouri - Teacher Asst. (TA)

(January 2024 – December 2024)

- Led lectures, labs, and graded assignments for first-year engineering students.

Leadership Experience

National Society of Black Engineers (NSBE)

(June 2021 – Present)

- **Executive Board Treasurer (& Interim Parliamentarian)** (April 2023 – May 2024)

- Managed finances, fundraising, and budgeting.

- **Executive Board Secretary**

(May 2022 – May 2023)

- Documented meetings, oversaw PR, and promoted professional development.

Minorities Mental Health Matters (MMHM)

(August 2023 – Present)

- **Executive Board Treasurer**

(October 2023 – May 2024)

- Co-founded organization focused on minority mental health awareness and advocacy.

College of Engineering Mentor

(September 2022 – December 2024)

- A leadership role as a mentor for freshman students answering questions regarding majors, classes, schoolwork and providing essential tips to succeed as an engineering major at the University of Missouri ~ Columbia.

Relevant Projects

Off-Grid Solar Battery Supply

(September 2023 – May 2024)

- Designed a portable solar-powered charging system using KiCad for PCB layout.

Portfolio Website

(July 2024 – September 2024)

- Developed a professional site showcasing skills and experiences using HTML & GitHub.

Color Memory Game

(February 2024 – April 2024)

- Developed an interactive color memory game inspired by the classic *Simon* game.
- Integrated RFID technology for player input, enhancing unique identification/interaction
- Created game's casing and components in AutoCAD.

Smart Home Automation System (small-scale)

(March 2023 – May 2024)

- Created a home system designed for disabled individuals to control their home essentials remotely such as alarms, external doors, blinds, etc.

iOS Application Prototype

(July 2024 – December 2024)

- Developed an iOS app on Xcode designed to educate users on phishing attacks by simulating real-world scam emails and analyzing responses.

Cyber Quest U.S. Cyber Challenge

(February 2025)

- Competed in a national cybersecurity challenge focused on incident detection and response.
- Analyzed packet captures (PCAP), security logs, and network traffic using Wireshark to identify cyber threats.
